

Gear pumps type PFC

external gears - fixed displacement

Available only on request

PFC are fixed displacement external gear pumps, axial hydraulic balancing, simple and sturdy construction, low noise level

Suitable for hydraulic oils or synthetic fluids having similar lubricating characteristics

Wide variety of displacements: from 1,6 up to 52 cm³/rev

Max pressure up to **260 bar**

Direction of rotation (as viewed at the shaft end): - = clockwise (supplied standard if not otherwise specified) S = counterclockwise Note: PFC are not reversible. The direction of rotation is indicated by an arrow on the pump casing; the same arrow shows also the direction of the oil flow (from the inlet to the outlet port)
